GRAPHIC DESIGN

It is essential for today's businesses to keep up with ever growing, ever changing trends in advertising and communication. We do just that, but with a twist. We pay attention to these trends and take them up a notch. We, not only keep up with standard industry trends, we set them. With our outside-of-the-box style and philosophy, we can make your business, product or event take off to new heights.

BRAND IDENTITY

Every successful business or product needs a face. By having a unique logo design (sometimes along with a clever slogan), your business or product(s) will have the identity that will leave a long lasting impression on all your clients, consumers, and the public in general. The right design can be so effective, that it can echo through generations to come and become a household name. Brand identity is not just about a simple image. Your brand should capture the essence of your business or product. It represents your philosophy, your culture, your purpose. It should be able to stand on its own and tell a story... your story.

MARKETING

Marketing campaigns should be carefully thought out, planned and executed, keeping total and complete consistency throughout all media (brochures, magazine and paper publications, indoor and outdoor advertisement, web site, television, etc.). It is of vital importance to a company. It should be clear, concise and effective.

ILLUSTRATION

At some point an established business, organization, event, product, or publication would need illustrations to convey an idea. Illustrations by themselves or complemented by copywriting are great tools to explain complex concepts and ideas that would be otherwise intangible and difficult to understand or visualize. We've all heard the saying "a picture is worth a thousand words". Illustrations are everywhere we look. We are surrounded by thousands if not millions of them every day. Some applications where illustration is used are:

- Marketing materials
- Instructional booklets
- Magazines, newspapers and books
- Advertisements
- Packaging and displays
- Within motion graphics

MOTION GRAPHICS

Sometimes a thousand words is not enough. When simple illustrations fail to convey an idea, we need to "call backup". This is when 2D & 3D animation, and live video come to play. Motion graphics is no longer for only film and television. It is a rapidly growing trend in web sites and even displays and outdoor advertisements.

PRINT DESIGN

Whether you need business cards, brochures, banners and posters for an event, or even a billboard, we can design and print them for you. Or bring your own print ready materials and we will print them for you. Small & large format (from business cards to billboards and everything in between).

Stationery, postcards, banners & posters, apparel, bumper stickers & decals, vehicle wraps, signage, displays, magazine and newspaper ads.
